Release: Immediate

Date: Sept 08, 2009

Popular Pro Cast bulk top dresser range now used as materials handler

Groundpro's Pro Cast range of quality bulk top dressers features a new conveyor system. The optional elevator makes this machine a versatile materials handling system.

The Pro-Cast has a choice of four generously-sized hoppers, made from 3 mm welded steel, with capacities ranging from 2000 to 4750 litres. The bigger units in particular offer excellent efficiency and productivity reducing time lost on refilling and journeys back and from base.

It is also acknowledged to be one of the most precise dressers on the market. Developments to its stainless steel rear delivery system have optimised its spreading function. Steel profile discs and a single aperture gate allow material to flow freely resulting in a consistent spread pattern. The spinning disks offer the latest hydraulic action with infinite adjustment for speed. Even when distributing wet material the powerful twin spinners achieve a spread of up to 16m going at a steady 2m³ per minute.

Earlier this year Groundpro launched the new front mounted conveyor system which is multifunctional and easy to use. It comprises a cross conveyor belt which feeds the fully adjustable hydraulically driven elevator belt. This allows it to deliver material into smaller top dressers and trailers and it can also back fill drains and top up bunkers.

more

This new feature is invaluable to golf course managers or contractors who as well as needing a machine that can distribute wet or dry loads efficiently to 16m, also need something with a more finite capability. The conveyor will be invaluable for replacing bunker sand and for feeding smaller dressers or truckster mounted top dressers in under a minute.

With safety a key feature, all ProCast machines have a wide axle track, and low profile tyres. A low centre of gravity increases stability on undulating ground. Standard features include a manual parking brake, a height adjustable draw bar, a draw bar jack, a high pressure oil filter to protect the hydraulic motor and digital tachometer for monitoring spinner speed. Extra wide tyres and a PVC hopper cover are optional extras. An adjustable hitch height fits a variety of manufacturers' tractors from 40-70 hp. Prices start from £ 16,550 ex VAT. The attachment is optional on all new machines.

Ends

Note to journalists:

Groundpro, the new deal direct trading division of Wiedenmann UK, gives all turf and ground care dealers across the country an opportunity to sell its products.

Groundpro images are available to download as high resolution jpgs on the Wiedenmann UK website.
