Release: Immediate

Date: Jan 22, 08

Wiedenmann's versatile Super 500 gives professional clean finish every time

The immensely versatile Wiedenmann Super 500 has proved a popular buy for golf course managers and for local authority use because it is naturally suited to park grounds, extensively maintained areas, ecological meadows, sports grounds and golf courses.

It can be used as a scarifier, flail mower or turf sweeper depending on the attachments employed. In any of its modes it produces a high airflow which ensures that the collected material is well compacted. It is highly manoeuvrable with a light footprint, the pneumatic tyres minimising pressure on fine turf work efficiently respectful of the ground they tread.

The 2.1 metre high dump facility on the CHD model allows for easy tipping into bins and trailers and this also comes as standard on the basic sweeping model.

Other options include rear lights; a floating rear axle which allows the Super 500 to follow undulating terrain more easily; a front roller to help reduce the chances of scalping and in-cab remote control to allow the operator the change the three operating functions - head unit lift and lower, hopper lift and hopper tip.

A de-thatching and scarifying unit is available with verticut blades that can be spaced 19mm, 38mm and 57mm centres. Introduced this season are optional Durablades™, Wiedenmann's strongest ever blade, made of tungsten steel.

Ends
