UK NEWS RELEASE

Release: Immediate

Date: Sept 12, 2012

Wiedenmann UK introduces Terra Clean 100 a budget sweeper/collector for synthetic surfaces

New to the market is Wiedenmann UK's **Terra Clean 100**, ideal for those looking for an entry level artificial pitch cleaner. At 1.2m wide, this towed sweeper/ collector has a four brush rotor and collects dirt and debris very efficiently before returning infill back to the playing surface.

Land driven, this machine can be towed behind a wide range of utility vehicles from 12 hp without the need for a PTO. This makes it an appealing purchase for a small operation especially as no hydraulics or electrics are required. The unit is therefore nippy and easily manoeuvrable and makes the most of its generous 50 litre collection hopper. The drive can be disengaged so it is easily transported on and off the playing surface and from site to site.

RRP is from £5,350.
