**WIEDENMANN UK NEWS RELEASE**

**Issue: Immediate**

**Date: July 2, 2010**

## **Wiedenmann UK unveils uniquely innovative snow clearance machinery at Saltex**

Two developments in snow clearance technology will be unveiled by Wiedenmann UK at Saltex.

Wiedenmann will firstly introduce the **Ice Master™** a clever dual-spreader which is sufficiently compact to negotiate pathways and pedestrian routes yet can spin grit to 6m to clear car parks.

At 1.2 wide, the Ice Master™ can either be PTO driven or hydraulically mounted. The innovative box unit can spread metered quantities of salt, sand or grit either via a drop spread or spinner system. With a flick of a switch the operator can change settings without leaving the seat.

Wiedenmann will also launch three styles of super smooth complementary snow blades.

The blades are part of Wiedenmann's growing **Snow Master™ range**. Each features a built-in shock absorption system. Even at speeds of up to 18.6 miles per hour (30km/hr) they take bumps in their stride.

With the Snow Master blades fitted up front and the Ice Master on the back, together they offer an exceptionally versatile "one-pass" snow clearance regime for schools, colleges, hospitals and estates.

**See Wiedenmann UK at stand V26A at Saltex, Sept 7 – 9, 2010.**
