

Wiedenmann™

UK NEWS RELEASE

Issue: Immediate

Date: July 28, 2010

Wiedenmann UK offers solutions to rain, wind and snow at Saltex

Aeration, surface conditioning and snow clearance will be the main themes for Wiedenmann UK at Saltex.

For cost saving aerating from 225 mm – 400 mm deep, the pick of the Terra Spike fleet, including tines and attachments, will show how decompaction and airflow can be achieved quickly and efficiently.

Four of Wiedenmann's newest machines – the Terra Float, Terra Seed, Terra Slit and Terra Rake bring affordable solutions for all aspects of soil and turf conditioning, whether for tight corners or deep undulations. Discover the one pass spiking seeder or a 3-piece floating roller for optimal contour following. See up close a host of innovative design features which cater for everything from fine turf to high winds, all of which deliver enviable productivity as standard.

And be among the first to witness Wiedenmann's Ice Master™ a clever dual-spreader which is sufficiently compact to negotiate pathways and pedestrian routes yet can spin grit to 6m to clear car parks.

Wiedenmann will also launch three styles of super smooth complementary Snow Master™ snow blades with a built-in shock absorption system. Even at speeds of up to 18.6 miles per hour (30km/hr) they take bumps in their stride.

See Wiedenmann UK at stand V26A at Saltex from Sept 7 – 9, 2010.

Ends
