Release: Immediate

Date: Sept 8, 2009

Wiedenmann UK's trio of artificial turf maintenance machines - the ideal choice

The beauty of a synthetic sports surface is that it doesn't need time consuming daily maintenance. Follow the manufacturer's after care programme and your carpet could last up to a decade.

Wiedenmann UK's trio of artificial turf maintenance machines – the Terra Clean, the Terra Top and the Terra Brush - are ideal for maintaining synthetic sports pitches.

Top of the list in any care schedule will be the daily removal of surface litter and debris. Wiedenmann's **Terra Clean** efficiently lifts discarded objects and waste while cleverly returning infill back to the pitch. A robust counter - rotating brush lifts surface debris into the primary hopper, placing it on a vibrating sieve while the debris is shaken into a collector at the rear of the machine. The sports infill falls naturally back into the carpet.

There are adjustable bearings on the sweeper brush so you can change its position, letting it wear evenly and maximising its life. The two removable collecting boxes each hold 40 litres of waste material and can be discharged easily by the operator without additional help.

Another key task is brushing sand and rubber crumbs back into the infill zone. Wiedenmann's infinitely versatile **Terra Brush** can do just that, also straightening fibres and levelling the surface in the same pass. The special zig zag arrangement of the individual brush strips achieves an even distribution of infill allowing the ball to run and reducing the risk of injury. The brushes have a 90° angle at the front and rear which contributes towards the pristine finish.

Should your surface require additional brushing effort, there is an optional synthetic rake that fits on to the front of the machine. This provides a more rigorous initial effort but still benefits from the follow on straightening and levelling action of the trailed brush.

more

If the surface requires more infill, Wiedenmann's sturdy **Terra Top** can dispense precisely measured quantities of rubber and sand. Its delivery rollers are accurately aligned to maximise even distribution. A rotating brush directs the dressing into the turf pile. The steep side walls and heavy duty agitator empties material efficiently, even when wet. With its solid and robust design the Terra Top is reliable over a lifetime with all drive components sealed to keep nuisance sand and dirt out. It also doubles as a handy-sized top dresser for use elsewhere. Choose between three point linkage and a trailed version.

All machines come with a variety of optional extras and in most instances have different sized options. Prices start from £1890 ex VAT.

Ends

Information for journalists
At a glance spec reference:

Terra Clean

Working width in mm:	1200
Weight in kg approx:	320
Hitch (semi-supported):	rear 3-pt. hitch cat. I
Minimum tractor lifting capacity in kg approx:	150
Drive:	540 RPM
Container volume in litres approx:	100
Carriage tyres:	11 x 7 - 4 AM
Gauge wheel front tyres:	11 x 7 - 4 AM
Air pressure in bar / PSI:	2 / 45

Terra Brush

	3 pt. Link	trailed
Length 3-pt./tow in approx:	1100	2420
Weight in kg approx:	110	160
Mounting:	rear 3-pt. hitch cat. I	Towbar
Option:	spring tine comb	spring tine comb
Drive:	ground-driven	ground-driven
Carriage lift out:		Hydraulic or electric

Terra Top

Working width in mm:	1350
Transport width:	1600
Weight in kg without trailer approx:	300
Drive:	PTO 540 RPM
Hopper capacity in l approx.:	400
Hopper capacity in l approx. with extension:	800
Loading height 3 pt. mounted in mm approx:	900
Loading height with hopper extension in mm approx:	1200
Loading height with trailer in mm approx:	1270
Loading height with hopper extension in mm approx:	1570
Ø feeder drum in mm approx:	230
Swinging axle with 4 tyres:	18 x 8-50 - 8 4 PR
