Combi Spread 5000™

Combi Spread 5000™ for rear attachment to tractors from approximately 20HP.

If you use sand, salt, grit and granulars for winter maintenance then the Wiedemann Combi Spread 5000™ saves buying a separate box gritter and circular gritter.

- Easy volume control via the adjustable feeding slide
- The feeding slide and the exchangeable gritting disc are made of stainless steel
- A loosening shaft ensures an extremely even flow of gritting material
- Parking stands, filler safety screen and a lighting holding device round off the standard equipment

Combi Spread 5000™
