

Wiedemann have a range of Material Collecting Systems offered in different sizes and capacities. All Wiedemann collectors deliver extremely high powered suction and high load capacity making them exceptionally efficient. Importantly, they are among the quietest on the market, especially suitable for noise sensitive areas such as schools, hospitals, and residential areas.

The MCS XP™ range of collectors is designed to fit all makes of tractors with either a mid mounted or front mounted deck.

The professional Material Collection System offers a wide range of side delivery chutes to fit all makes of deck, resulting in a very versatile unit which is easily demounted. Choose between a 1200 or 1500 litre hopper. Efficiency is maximised in these bigger machines. Their extremely high powered suction and high load capacity means cost effective operation. High emptying can take place up to approximately 200cm. Pneumatic tyres, collecting chute, suction hose, parking stand and linkage pins are provided as standard.
