

**NEW**

**Snow Master Vario 3300™**

Snow Master Vario 3300™ combined blade with spring flaps for two-axle tractors up to 50HP.

- Ideal for difficult and narrow conditions, pavements, and car parks
- Arrowhead or V blade formation can be adjusted using hydraulic cylinders
- A pendulum suspension lets it take bumpy surfaces in its stride
- Comes with up to four spring flaps as standard as well as an exchangeable plastic wear strip and slide shoes, and two double-acting hydraulic cylinders
- For safety the blades fold down automatically when ramming obstacles, afterwards a tensioned spring movement returns them to the working position
