

An exceptionally versatile machine, the Super 500 collector is naturally suited to park grounds, extensively maintained areas, ecological meadows, sports grounds and golf courses. Use it as a verticutter, flail mower or turf sweeper and be impressed by its speed and manoeuvrability. Like all Wiedemann sweeping machines, it has pneumatic tyres, minimising pressure on fine turf areas. The parallelogram-guided sweeper head ensures that implements maintain an optimal working position at all times. This is a great advantage as its floating head ensures a clean pass over undulating ground. Its high performance vacuum packs the 2500 litre hopper every time leaving a professional clean finish.

Choose from two base models. High dump is a standard feature on the Super 500 SHD & CHD models. The container lifts via a parallel system to a height of 2.1m while rotating the hopper to completely discharge collected material. The CHD blade options include flail and verticut blades and can be set to verticut at 57mm, 38mm or 19mm spacings.

### Super 500™

Super 500 SHD High dump sweeper collector

Super 500 CHD High dump cutting/verticutting collector

(CHD model requires blades)

### Options for Super 500 CHD

123 00 08 Flail blades pack

123 00 11 Verticutting blades pack (57mm centres)

123 00 10 Verticutting blades pack (38mm centres)

123 00 09 Verticutting blades pack (19mm centres)

123 00 14 Durablade verticutting blades pack (57mm centres)

123 00 13 Durablade verticutting blades pack (38mm centres)

123 00 12 Durablade verticutting blades pack (19mm centres)

123 06 70 Anti scalp roller

### Options for all models

123 05 50 Golf course kit

123 00 28 Lighting kit

123 00 26 Swinging axle with four wheels

123 00 07 Electromagnetic control with 3 functions
