

NEW**Artificial & Natural Use Terra Brush™**

The infinitely versatile Terra Brush™ can be used daily on different surfaces performing many different jobs.

On synthetics it brushes sand and crumbs back into the infill zone, straightening fibres and levelling the surface. The special zigzag arrangement of the individual brush strips achieves an even distribution of the infill, thus improving the ability of the ball to run and reducing the risk of injury. On grass it removes early morning dew before you cut, brushes in top dressing and worm cast removal without using chemicals and is also perfect for presenting turf areas in non-cutting months.

For a maximum working width of 3.95m choose a base unit then add one hitch option and one wing option.

Terra Brush™**Trailed base unit 1.85m**

504 00 40

Comes with zig zag brushes with FIRM bristles. Ideal for playing fields, fairways and synthetic surfaces

504 00 41

Comes with zig zag brushes with SOFT bristles. Ideal for golf greens
