

NEW

Terra Rake™

The Terra Rake™ is a specialist piece of maintenance equipment which loosens compacted infill, letting water drain away and stops algae and moss building up. With a wide robust frame and five closely arranged rows of spring tines it forms a parallelogram shape. Attaches to tractors via three point linkage and comes in two working widths.

Terra Rake™

495 00 40

Working width 1.6m

496 00 40

Working width 2.1m

NEW

Terra Top™

The sturdy Terra Top™ dresses artificial surfaces with precisely measured quantities of rubber and sand. The delivery rollers are accurately aligned to maximise even distribution. A rotating brush directs the dressing into the turf pile.

Terra Top™

835 00 40 1.35m working width with 1.6m transportation width includes 3pt linkage
