

An almost identical machine to its sister the FXL, the TXL is specifically for use by tractors with front linkage, either via an A frame hitch or 3 point linkage. The TXL range of decks comes in similar widths to the FXL-1.3m, 1.5m and 1.8m – and also features rear or side discharge options.

Robust welded construction, low noise emission and excellent cutting performance make both the TXL and FXL consistently some of Wiedemann's most popular machines. Often seen in combination with Wiedemann collectors, they allow operators to cut and collect efficiently. Mowers feature large pneumatic support wheels, 3 anti-scalp rollers, high blade tip speed and generous over cut. TXL mowers fit to most front 3 point linkage systems and are supplied complete with pins and PTO shaft.

## Tractor

453 00 40	TXL-s 130 1.3m wide side discharge deck
840 00 40	TXL-s 150 1.5m wide side discharge deck
843 00 40	TXL-s 180 1.8m wide side discharge deck
838 00 40	TXL-h 130 1.3m wide rear discharge deck
842 00 40	TXL-h 150 1.5m wide rear discharge deck
844 00 40	TXL-h 180 1.8m wide rear discharge deck

## Options for TXL-h decks

120 04 50	1.3m recycle mulching kit including blades
120 04 51	1.5m recycle mulching kit including blades
120 04 52	1.8m recycle mulching kit including blades
118 45 60	1.8m deck elevation box for Aebi, Rasant, Reform
100 00 13	Noise measurement including certificate
